

WMX 804

CHAIN ACTUATOR

OPENING STROKE SIZES

250 mm (programmable)

PUSH FORCE

150 N

VOLTAGE

24V DC (+/- 10%)

DESCRIPTION

Designed for surface mounting. To be used with all window types. To be used together with $\pm 24V$ control units or control units with MotorLink®. Can be used together with espagnolette WMB. External safety edge can be connected directly to the actuator (actuator version 'E'). Synchronization of up to four window actuators – no need for an external synchronization module. Genuine position feedback and three speeds when using control unit with MotorLink®. Soft close. The electronics in this actuator can be programmed to suit specific requirements – i.e. pressure- and traction force, stroke, speed/sound level – with the WAT 100 programming box, also possible following installation. Built-in electronic load switch-off/end stop. Electronic actuator with micro controller. The actuator has an integrated reverse function to ensure a prolonged life span of the window gaskets. Easy mounting.

ACTUATOR VARIANTS

The actuator is available in four different versions: single actuator (-1), double actuator (-2), triple actuator (-3) and quad actuator (-4). The synchro actuators (-2, -3 and -4) are equipped with a patented synchronization function, in which the actuators communicate directly with each other, which ensures the actuators operate at exactly the same speed and position. On large windows up to four actuators can be mounted on the same window – with no need for an external synchronization module.

PRESSURE SAFETY FUNCTION

The risk of entrapment is reduced as the actuators are programmed to reverse if they encounter obstacles when closing. The set points determining when the actuators are to reverse are individually adjustable and can be adjusted after installation using the programming box WAT 100.
