

WSK 100

VENTILATION KEYPAD

DESCRIPTION

The ventilation keypad is used for the manual opening and closing of electrically operated windows, smoke vents or light domes. The ventilation keypad signal has second priority in the smoke unit, meaning the signals from smoke detectors, smoke ventilation switches and external smoke alarm units have first priority. Surface or flush mounting. When surface mounting WSA 209 01 mounting frame must be used. The frame is to be ordered separately.
