

70 Volt Transformer Kit

(ZT-MNS-70-XFMR)

Description

The ZT-MNS-70V-XFMR transformer provides a simple means to significantly increase the distance between the ZT-MNS-100BAS panel and the various speaker/zones connected to it.

The transformer converts the 25 VRMS speaker output to 70 VRMS, thereby reducing power losses in long wire runs.

The transformer is housed in a 204mm x 178mm metal enclosure with no user controls inside. A five-conductor cable connects the transformer to the ZT-MNS-100BAS panel

Features

- 25 VRMS to 70 VRMS audio conversion for long wire runs
- Five conductor connection between ZT-MNS-100BAS and ZT-MNS-70-XFMR enclosure
- Mount conveniently near the ZT-MNS-100BAS

Technical Specification

Input	25 VRMS Audio 100 W continuous
Output	70 VRMS audio 100 W continuous
Installation	Surface Mount
Enclosure	210mm H x 185mm W x 96mm D
Weight	2.72 Kg
Temp Range	0°C - 49°C
Humidity	90% max, non-condensing
Approvals / Listings	ETL

- Standard Configuration: no options installed.
- For specifications on options, please refer to individual data sheets.
- Specifications are subject to change without notice due to product improvements
